Voluntary Movement

<i>Moving unit is ...</i>	<i>Moving Through ...</i>	<i>Stopping In ...</i>
 Basic	1 Cohesion Hit for both the stationary and moving unit	Not Allowed
 Skirmishers (SK)	No penalty	Not Allowed
 Velites (VE)	Same color: No penalty All others: Same as Basic	Not allowed
 Roman LG/CO/HI ^[a]	Same color: No penalty All others: Same as Basic	Roman LG/CO/HI: Allowed ^[b] All others: Not allowed

Rout Movement

<i>Routing unit is ...</i>	<i>Moving Through ...</i>	<i>Stopping In ...</i>
 Basic	1 Cohesion Hit and TQ check for the stationary unit; no effect on moving unit	Moving unit continues to move one more hex* 1 Cohesion Hit and TQ check for the stationary unit; no effect on moving unit
 Velites (VE)	SK and VE units: No penalty All others: 1 Cohesion Hit for stationary unit; no effect on moving unit	Moving unit continues to move one more hex* SK and VE units: No penalty All others: 1 Cohesion Hit and TQ check for the stationary unit; no effect on moving unit
 Roman LG/CO/HI ^[a]	Same color: No penalty All others: Same as Basic	Moving unit continues to move one more hex* Same color VE: No penalty All others: 1 Cohesion Hit and TQ check for the stationary unit; no effect on moving unit

* Moving unit is eliminated if the “one more hex” is occupied, in an enemy ZOC, or is impassable terrain. If occupied by a friendly unit, that unit also suffers the “Stopping In” penalties noted on the chart.

- a If the moving or stationary units are stacked, treat as Basic. This does not apply to moving/routing Velites. Treat the CE Type as CO.
- b Stacked units of different color or classes incur a +1 DRM to all TQ checks
- A Routed unit that incurs a Cohesion Hit is eliminated. For the TQ check, if the DR is greater than the unit’s TQ, the unit incurs Cohesion Hits equal to the difference.
 - A unit may move through or stop in hex occupied solely by a leader(s)
 - A unit using Voluntary Movement may never stop and stack with a Routed unit
 - Skirmishers (SK) that Rout are eliminated
